I am a retiree of NBC, and urge you to reject NAB petition 04-160. One thing I learned in my twenty-six years at NBC is competition is good; competition is what makes for a better product. Instead of restricting satellite radio, radio stations should be thinking of ways to provide a better service. Protectionism does not move the marketplace forward, competition does. Please reject the NAB's petition that would stifle competition, and help stifle the natural forces of competition in a free market.
